

DURAtelpage

Voice Prompted Telephone Paging

DURAtelpage connects to the telephone system (both legacy PBXs and IP PBXs) and enables phone users to send messages to a range of receiving devices from the phone keypad by following the pre-recorded voice prompts.

Features:

- > Connects to legacy and IP PBXs via an analog extension
 - FXS port
- > Multiple modules can operate simultaneously
 - Hunt groups
- > Resilient appliance - no moving parts
- > No software installations required - fully web based
- > Inactivity timeout messages
- > Logging of all message and alarm activity
- > Configurable from DURAsuite management screen
