

# Warning!! Don't risk a fine! Are you breaching music copyright laws?

Copyright laws require you to license your business phone lines/trunks annually if you choose to play either the Radio or any commercially released music (CDs or Mp3 files). You can be fined if you are found to be broadcasting commercial music without paying licences. Get the professional image with customised messages before 31st Oct, 2010 and **receive a Commercial Mp3 Player for FREE!!! ....**

**..a compelling alternative to playing music illegally in your business...  
.....or paying an annual licence fee!**

#### How it works?

On receipt of your order, a Music On Hold (MOH) representative will contact you to discuss your messaging requirements. An MOH WebLogin will be created for you to upload your script content where you will also be able to sample music & voice options, and approve your final files.

Tie Networks can install the Music On Hold Player and show you how to load (future) MOH files via USB, if you ever need them.

After confirmation of your script we will record your messages and send to either Tie Networks or directly to you, to load onto your MOH Player.

To update your messaging at anytime you can LogIn into your MOH account and upload your script changes. Updates from \$225.00 ex gst

\*Conditions Apply. All services will be billed by Tie Networks. Messages must be taken within 45 days. Additional charges may apply for installation.
